## CharityMania Official Rules

### **FootballMania 17-Week Edition**

1. FootballMania begins the first week of the professional football season (currently scheduled for September 6th).
2. A ticket's value in any given week is determined by the combined scores of the three football teams listed on the back of the ticket for that week. On the back of each FootballMania ticket, you will see a different set of 3 teams for each of the 17 weeks of the professional football season.
3. Prizes are awarded in each of the 17 weeks of the professional football season. Each week, the top 4 highest scoring tickets and the 2 lowest scoring tickets win prizes. At the end of the season, tickets with the most and fewest combined points for all weeks win grand prizes. See the front of your ticket for details on prize money amounts.
4. A FootballMania ticket is eligible to win prizes only after the date it is purchased.
5. Winners will be notified by the participating organization that sold the FootballMania ticket.
6. When two or more tickets have a tie score, then the number of total yards gained by the teams on the tickets is used as a tiebreaker to determine the winner. The more total yards gained by the teams on the ticket, the higher the ticket's value. Please note that higher tiebreaker values are better for the 'High Score Winners' and lower tiebreaker values are better for the 'Low Score Winners'.
7. All tickets are unique. No two tickets have the same three teams in any given week.
8. Football teams that have a bye (do not play) in a given week are assigned their score from the previous week. If the team has a bye in week 1, then the score from the last week of the pre-season is used.
9. The minimum odds of winning are 1 in 48.2.
